

Machine Learning Based Vehicle Performance Analyzer

Team ID: PNT2022TMID39717

Sprint 1

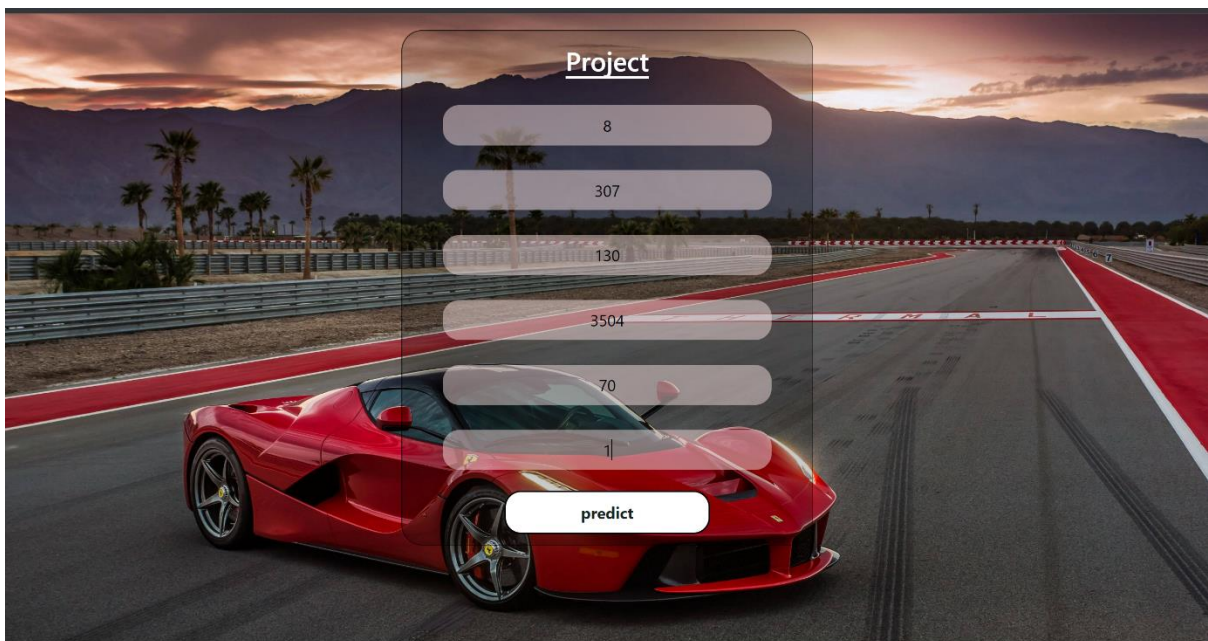

- Visiting webpage

Sample Output

A screenshot of a web application interface for a vehicle performance analyzer. The background is a high-quality image of a red Ferrari sports car on a racetrack at sunset. Overlaid on this is a semi-transparent white form titled "Project". The form contains six input fields with placeholder text: "No. of cylinders", "Displacement", "Horse Power", "Weight", "Model year", and "Origin". Below these fields is a blue button labeled "predict".

Sample predict page

A screenshot of the same web application interface, but with numerical values entered into the input fields. The values are: 8 for "No. of cylinders", 307 for "Displacement", 130 for "Horse Power", 3504 for "Weight", 70 for "Model year", and 1 for "Origin". The "predict" button is now white with black text.
